NEW

Mushroom Cultivation IV
appropriate technology for mushroom growers

The mushroom manual for growers, scientists, biology & agriculture students.

With new information on:
• Biocontrol in mushrooms
• Liquid Spawn
• Recycling casing soil
• Reusing spent substrate
• Supplementation
• NIR analysis of compost
• Circular economy
• Combining mushrooms and greenhouses
• Updated suppliers list

520 pages, color, hardcover.
Available at Amazon Europe
For wholesale please contact: info@spore.nl
# Contents

The pink coloured chapters are new in this 4th edition.

1. **Benefits of mushrooms**
2. **General biological information on mushrooms**
3. **Substrate characteristics**
4. **Technical data of mushroom species: an overview**
5. **Spawn, breeding and conservation of strains in general**
6. **Environmental care and certification schemes**
6a. **Circular economy and mushroom cultivation**
6b. **Combining greenhouses and mushroom cultivation**
7. **Feasibility: cost and returns**
8. **Mushroom markets and marketing**
9. **Organisation: extension and research**
10. **Practical aspects of spawn production**
10a. **Liquid spawn**
11. **Climate control in general**
11a. **Understanding the Mollier diagram**
12. **Simple mushroom farms**
13. **Advanced mushroom farms and tunnels**
14. **Modern climate control installations**
14a. **Innovations in energy saving and sustainable energy production**
15. **Cultivation on fermented substrates in general**
16. **Casing soil**
17. **The indoor composting process for *Agaricus* cultivation**
18. ***Agaricus* cultivation: from spawn run to harvest**
18a. **Supplementation in *Agaricus* cultivation**
19. **Mechanisation in *Agaricus* cultivation**
20. **Cultivation on pasteurised substrates**
21. **Cultivation on sterilised substrates**
22. **Lentinula edodes (Shiitake) cultivation on sterilised substrates**
23. **Cultivation on wood logs**
24. **The collection and "cultivation" of ectomycorrhizal mushrooms**
25. **Post-harvest handling**
26. **Pests and diseases**
27. **Biological control of pests and diseases**

## Appendices

A. **Safe use of pesticides**
B. **Conservation of strains and culture collections**
C. **Spore allergies**
D. **Maintenance chart**
E. **Temitomyces: a common genus in Africa and South-East Asia**
F. **Suppliers**
G. **Chemical analysis for mushroom cultivation**
G1. **Quality control of compost with NIR**
H. **Annotated bibliography**
I. **Management and motivation**
J. **Glossary**
